Subject:
Airport Road Waste Disposal Building
Chapel Hill, North Carolina

Dear Mr. Williams:

ARCADIS periodically observed the Airport Road Waste Disposal Building in Chapel Hill, North Carolina over the course of construction. Based on our observations and final inspections, the building was constructed in general conformance with the Project Plans and Specifications.

The Building's General Contractor, Professional Building Systems, has supplied As-Built Drawings and an Engineer's letter of approval for minor modifications made to the pre-engineered building steel framing. We have enclosed this letter and the As-Built drawings for your files in the event these are needed for future reference.

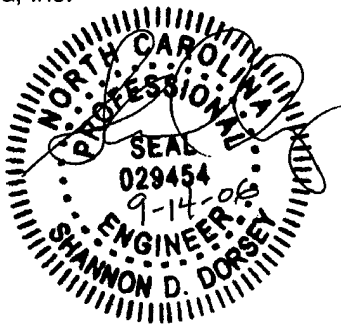

We appreciate the opportunity to be of assistance with this project. Please contact us if we can be of further assistance.

Sincerely,

ARCADIS G&M of North Carolina, Inc.

Shannon Dorsey, PE
Structural Engineer

Raleigh, NC 27607

Mr. Porco

FSP Consulting and Design Engineers have previously offered recommendations for aforementioned project pertaining to field located opening. These modifications have been successfully completed. The field located vents and opening are within current industry standards and are acceptable per our professional recommendations.

If further information is required, please don't hesitate to call or email.

Respectfully,

Franklin S. Pajaro, P.E., S.E.
President
