Subject: The University of North Carolina at Chapel Hill, Cogeneration Facility Warehouse
Response to Notice of REC Program Eligibility Letter

Dear Mr. Kirby:

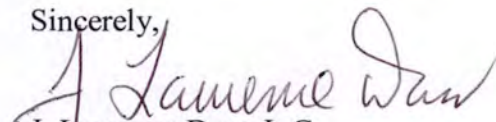

I am writing in response to your November 17, 2010 Notice of REC Program Eligibility letter for the University of North Carolina at Chapel Hill (UNC) Cogeneration Facility Warehouse.

As outlined in my correspondence dated November 12, 2010, excavation of impacted soils within the building footprint was conducted between October 26, 2010 and November 6, 2010. Supplemental excavation events, outside of the building footprint, were conducted on December 13, 2010 and January 4, 2011 to remove additional impacted soils in areas of planned utility infrastructure construction. Excavation in one additional area will be completed following installation and partial backfilling of the building foundation.

Although your November 17, 2010 letter indicated that a response was needed within 60 days, UNC respectfully requests a ninety (90) day extension to April 18, 2011 to make a decision regarding entry into the Registered Environmental Consultant (REC) program. Additional time is needed to conclude soil abatement and compile data from the previous abatement activities.

Please contact me at (919) 962-6666 if I can be of further assistance. Thank you.

Sincerely,

J. Laurence Daw, L.G.
Geophysicist/Licensed Geologist
