From: Wade Kirby *WK*

Re: UNC – Cogeneration Facility

Larry called on April 11 and I returned the call. He said they had requested a time extension before in hope to complete excavation at the site. He said the area they needed to excavate was a staging area for the contractor and they were not able to get in until last week. He respectfully requested another 90 day extension. This would allow time for the samples to be analyzed and the report completed. He said they had several peer reviews to complete before they released the document. He said he had drafted a letter of request outlining why they needed the extension. I told him we would grant extension but need the letter.
