302 South Building CB#1000  
Chapel Hill, North Carolina 27599-100

Subject: UNC-Chapel Hill Bingham Facility  
Deemed Permitted Pump and Haul  
Chatham County

Dear Mr. Mann,

The Division of Water Quality has reviewed the application request made by The University of North Carolina at Chapel Hill (UNC) on January 20, 2010 for the proposed Pump and Haul activities to the OWASA Mason Farm Wastewater Treatment Plant. In accordance with NC State Administrative Code 15A NCAC 02T, effective September 1, 2006, the 400,000 gallon Pump and Haul system at UNC meets the requirements of 15A NCAC 02T .0113(a) for systems to be deemed permitted. Due to designation of the Pump and Haul as deemed permitted, the Division of Water Quality does not require an application fee from the Permittee, therefore pump and haul activities may commence upon receipt of this letter. Please find enclosed Check No. 03-691696 dated January 19, 2010 in the amount of \$1,310.00. Please note that future Pump and Haul activities will require Division approval in accordance with paragraph (e) of Rule 15A NCAC 02T .0113.

The Pump and Haul facilities shall be effectively maintained and operated at all times so that there is no discharge to the surface waters, nor any contravention of groundwater or surface water standards. In the event that the facilities fail to perform satisfactorily, including the creation of nuisance conditions due to improper operation and maintenance, or failure of the facilities to adequately contain the wastewater, the Permittee shall take immediate corrective actions including those actions that may be required by the Division, such as the construction of additional or replacement wastewater collection and / or storage facilities.

Please be advised that the deemed permitted classification from the Division of Water Quality does not exempt the Permittee from complying with any and all statutes, rules, regulations, or ordinances, which may be imposed by other government agencies (local, state, and federal) that have jurisdiction. Of particular concern to the Division are applicable river buffer rules in 15A NCAC 02B .0200, erosion and sedimentation control requirements in 15A NCAC Chapter 4 and under the Division's General Permit NCG010000, and any requirements pertaining to wetlands under 15A NCAC 02B .0200 and 02H .0500. In addition, the deemed permitted classification from the Division of Water Quality is effective only with respect to the nature and volume of wastes described in the application and other supporting data. No variances to applicable rules governing the construction and / or operation of the permitted facilities are granted unless specifically requested and granted in writing from the Division of Water Quality.

Failure to abide by the conditions and limitations contained in the requirements of 15A NCAC 02T .0200 may subject the subject facility to an enforcement action by the Division in accordance with North Carolina General Statute 143-215.6A to 143-215.6C.

If you have any questions please feel free to contact me or Matthew Fleahman or at (919) 791-4200.

Sincerely,

S. Jay Zimmerman, L.G.

Environmental Program Supervisor
