Subject: UNC-CH response to Notification of Unauthorized Activity/Permit Noncompliance

Hi Andy,

As we discussed this morning, you confirmed that the USACOE received its copy of the packet of information that we also provided to the NC DWQ last week in response to the DWQ NOV for wetland and stream impacts at the Bingham Facility. The packet that you received contains the information that you requested in the Notification of Unauthorized Activity/Permit Noncompliance dated May 18, 2010. The information that you received includes a restoration plan for the area of unauthorized fill and a Pre-Construction Notification for the two areas of fill authorized under Nationwide Permit #39. Both of these items were requested in your May 18, 2010 Notification.

Please let me know if you require any additional information relating to the Notification response.

Thanks.

Sharon
