
You have a spot, take your shot. A tested, safe and effective vaccine will be available to all who want it, but supplies will be limited at first. To save lives and slow the spread of COVID-19, independent state and federal public health advisory committees recommend first protecting health care workers caring for patients with COVID-19, people who are at the highest risk of being hospitalized or dying, and those at high risk of exposure to COVID-19. Keep practicing the 3 W's—wear a mask, wait six feet apart, wash your hands—until everyone has a chance to get vaccinated.

- Health care workers fighting COVID-19 & Long-Term Care staff and residents.
- Adults 75 years or older and frontline essential workers.
- Adults at high risk for exposure and at increased risk of severe illness.
- Students
- Everyone who wants a safe and effective COVID-19 vaccination.

Vaccinations will happen by group in the following order:
- **Group 1:** Anyone 65-74 years old, regardless of health status or living situation
- **Group 2:** Anyone 16-64 years old with high-risk medical conditions that increase risk of severe disease from COVID-19 such as cancer, COPD, serious heart conditions, sickle cell disease, Type 2 diabetes, among others, regardless of living situation
- **Group 3:** Anyone who is incarcerated or living in other close group living settings who is not already vaccinated due to age, medical condition or job function
- **Group 4:** Essential workers not yet vaccinated
