Re: Drinking Water Testing

Occupants of Campus Y,

Environment, Health and Safety has performed partial drinking water testing for detectable lead in your building and has found no detectable lead present. Below are the fixtures that were tested as well as the results:

<table>
<thead>
<tr>
<th>Sample Date</th>
<th>Location</th>
<th>Type</th>
<th>1st Sample (ppb)</th>
<th>2nd Sample (ppb)</th>
</tr>
</thead>
<tbody>
<tr>
<td>10/25/2022</td>
<td>Room 303 - Kitchen</td>
<td>sink</td>
<td>non-detect</td>
<td>non-detect</td>
</tr>
<tr>
<td>10/25/2022</td>
<td>Stair 2</td>
<td>drinking fountain - right</td>
<td>non-detect</td>
<td>non-detect</td>
</tr>
</tbody>
</table>

Highlighted gray areas in the 2nd Sample column indicate samples that were not collected. This applies primarily to ice makers (not capable of flushing) and sinks. EHS would have collected a 2nd sample if the 1st sample results were detectable.

One drinking water fountain (left) on Stair 2 was not working and we were unable to sample. Once is fixed, we will gather those samples and update you again on results. The drinking water fixtures that showed no detectable lead will be placed back in service and signs will be removed. Questions can be directed to the Environment, Health and Safety Department at 919-962-5507. Campuswide drinking water updates can also be seen at the EHS website and on the EHS Twitter account at @unc_ehs.

Thank you,
Catherine Brennan
